

ENVIRONMENTAL CREDENTIALS SCHEME

A scheme to assure you of the accuracy and honesty of the Environmental claims made for products. If a product is accredited by the Recognised Scheme, you can be confident it is truly a **GREEN** product and safe for the environment.

What is the Recognised Scheme?

It identifies environmentally preferable I&I cleaning products through science-based criteria

- Developed by a working group of chemists and technical specialists from industry
- Reviewed by an Independent Panel of expert toxicologists as being “sound and robust”, “science-based, targeted and pragmatic”¹

It focuses on the environment

- Helps minimise potential environmental impacts in distribution, use and disposal of cleaning products
- Recognises the potential impact of cleaning products on human health

It is independently assessed

- Evidence-based and objective process administered by ACCORD
- Product data assessed against the criteria by third-party scientific assessor Toxikos Toxicology Consultants

Accord is the national industry association for manufacturers and suppliers of all types of cleaning, hygiene, disinfectant and specialised products
