GLYCERENE TEAT DIP EMOLLIENT

DESCRIPTION

GLYCERENE is an emollient which is used as an additive in teat dip and spray solutions.

APPLICATION

GLYCERENE is specially recommended in dry or muddy conditions.

Regular use of GLYCERENE will assist in healing cuts and abrasions.

GLYCERENE should be used in place of paraffin or bloat oils which have been found to de-activate the bactericide in teat sanitiser products.

BENEFITS

- Compatible with all types of teat dips and sprays.
- Does not de-activate commonly used teat sprays and dips.
- Highly concentrated to ensure economy in use.

DIRECTIONS FOR USE

GLYCERENE can be used to replace up to 20% of the water in all teat sanitiser solutions.

The Product Information Sheet supersedes all previous issues for this product. Information contained herein is offered in good faith as being true and accurate to the best of our knowledge, but as the conditions of use are beyond our control, no guarantees are either stated or implied.

Where health or safety data given discloses a risk to the user or the environment, it is the responsibility of the purchaser to pass on the information to employees who may be using the product, ensuring that adequate safety procedures are used, including good industrial hygiene.
