LINK

LIQUID HERBICIDE ADJUVANT

ACTIVE CONSTITUENT :417 g/L AMMONIUM SULPHATE

DESCRIPTION

Link is for use with Glyphosate based herbicides to minimize antagonism when tank mixing with flowable herbicides and improve performance under adverse environmental conditions.

DIRECTIONS

Link is used at a rate of 2 litres per 100 litres of spray solution.

1. Half fill spray tank with clean water and start agitation.
2. Add **Link** liquid through top opening of spray tank.
3. While agitation is still running, add required flowable herbicide to the tank and mix thoroughly.
4. Then add the required amount of glyphosate based product and the remaining water, mix thoroughly.
5. If required, add the necessary surfactant near the end of the filling process (this is to minimize foaming).
6. It is a must to maintain adequate agitation during application and use the prepared tank solution promptly.
7. **Link** should be used with non selective herbicides only, as with some selective herbicides used may result in the loss of selectivity and therefore crop damage.
8. Ammonium Sulphate can be corrosive to metal parts, thoroughly flush tanks, pumps and nozzles with **Absolute Boomer** or **cc49** after use.

IMPORTANT

This information has been reproduced from the product label and is a guide only.

Always read the product label on the container for all instructions, recommendations, critical comments and conditions of sale.

NOTE! Not to be used for any purpose or in any manner contrary to the label unless authorized under appropriate legislation.

HEALTH AND SAFETY INFORMATION

See separate Material Safety Data Sheet available upon request.

The Product Information Sheet supersedes all previous issues for this product. Information contained herein is offered in good faith as being true and accurate to the best of our knowledge, but as the conditions of use are beyond our control, no guarantees are either stated or implied.

Where health or safety data given discloses a risk to the user or the environment, it is the responsibility of the purchaser to pass on the information to employees who may be using the product, ensuring that adequate safety procedures are used, including good industrial hygiene.
