## SLATE FINISH

### DESCRIPTION

Tasman SLATE FINISH is a high performance, multi-purpose, low maintenance sealer polish. It is primarily used in dry areas with heavy traffic. It is a scuff and slip resistant, wax-free polish, suitable for the following surfaces: slate, terrazzo, paving brick, terracotta, marble, quarry tiles, stone, rubber, linoleum, vinyl, thermoplastic and seamless tiles.

Initially two coats are required.

Slate Finish is only for interior use.

### DIRECTIONS FOR USE

1. Tasman SLATE FINISH is suitable for use in all indoor areas excluding wet areas, shower recesses, spas, etc.
2. After Tasman SLATE SEAL, ALL STONE SEALER, NATURAL LITE SATIN has been used and dried thoroughly, apply two coats of Tasman SLATE FINISH allowing one hour between applications.
3. For regular maintenance sweep floor daily to remove dust and light soils. Difficult stains can be spot cleaned with Tasman TILE KLEEN.
4. If your floor looks dull after heavy traffic, wash with TILE KLEEN and apply Tasman SLATE FINISH to traffic areas only. This can be done four times a year (depending on the wear) to protect your seal and eliminate resealing completely.
5. Application of Tasman SLATE FINISH should be made with a clean mop or lambswool applicator. You can either use this product diluted 1:1 with clean water for a matt finish, or undiluted to achieve a high finish. Tasman SLATE FINISH responds well to machine buffing if available.
6. If re-applying Tasman Slate Seal Gloss or Slate Seal Satin, Slate Finish should be completely removed by using Tasman's Ripper Stripper or other suitable polish remover.

### COVERAGE

1 litre will cover approximately 40 m<sup>2</sup> with a single coat.

The Product Information Sheet supersedes all previous issues for this product. Information contained herein is offered in good faith as being true and accurate to the best of our knowledge, but as the conditions of use are beyond our control, no guarantees are either stated or implied.

Where health or safety data given discloses a risk to the user or the environment, it is the responsibility of the purchaser to pass on the information to employees who may be using the product, ensuring that adequate safety procedures are used, including good industrial hygiene.
