SLATE SOLVENT

DESCRIPTION

SLATE SOLVENT has been specifically formulated to remove acrylic sealers. SLATE SOLVENT is a ready to use product which contains a powerful blend of solvents and emulsifiers.

APPLICATIONS

For effective performance a liberal coat of SLATE SOLVENT should be applied to the surface to be stripped using a paint brush. Reaction time varies between 10 and 20 minutes depending on the type and number of coats of sealer to be removed.

BENEFITS

Fast working stripper compared to conventional slate strippers.
Does not contain methylene chloride.

DIRECTIONS FOR USE

In order to determine whether SLATE SOLVENT will completely remove the sealer from your floor a test area of one or two tiles should be attempted before stripping your entire floor.

WEAR SUITABLE PROTECTIVE CLOTHING AND GLOVES

Work in areas of two square metres at a time.

Apply SLATE SOLVENT to area to be stripped with a paint brush so an even coating is on the tile. Allow to stand for 15-20 minutes so SLATE SOLVENT may penetrate the surface and soften the coating.

Scrub with a stiff brush and wipe the treated area clean using a cloth.

Repeat steps 2 to 5 if any residue remains.

SAFETY INSTRUCTIONS

Refer to the Material Safety Data Sheet.

The Product Information Sheet supersedes all previous issues for this product. Information contained herein is offered in good faith as being true and accurate to the best of our knowledge, but as the conditions of use are beyond our control, no guarantees are either stated or implied.

Where health or safety data given discloses a risk to the user or the environment, it is the responsibility of the purchaser to pass on the information to employees who may be using the product, ensuring that adequate safety procedures are used, including good industrial hygiene.
