SUPRA RINSE

RINSE AID FOR MACHINE DISHWASHING

DESCRIPTION

SUPRA RINSE is a drying agent which when added to the final rinse water of glass or dish washing machines, by means of a specially designed feeder, dramatically reduces drying time of washed articles. SUPRA RINSE also markedly improves the finished appearance of crockery, glassware and cutlery by eliminating water spotting.

APPLICATION

SUPRA RINSE is a pink moderately viscous liquid and contains ingredients which, when mixed with water at 60-90°C rapidly lowers the surface tension of water and prevents water from forming droplets on a surface. This product is equally effective in both soft and hard water as it contains a water softener and antiscaling agents.

SUPRA RINSE eliminates the need for manual toweling of washed articles, thus reducing the possibility of spreading pathogenic organisms due to this method of drying.

SUPRA RINSE is safe on all metals normally found in the construction of dish washing and glass washing machines.

BENEFITS

- ◆ Effective in hard or soft water.
- ◆ Eliminates spotting and streaking.
- ◆ Safe on metals and plastic-ware.
- ◆ Economical to use.
- ◆ Contains an antiscaling agent.
- ◆ Colour coded for safety and identification.

The Product Information Sheet supersedes all previous issues for this product. Information contained herein is offered in good faith as being true and accurate to the best of our knowledge, but as the conditions of use are beyond our control, no guarantees are either stated or implied.

Where health or safety data given discloses a risk to the user or the environment, it is the responsibility of the purchaser to pass on the information to employees who may be using the product, ensuring that adequate safety procedures are used, including good industrial hygiene.

SUPRA RINSE

RINSE AID FOR MACHINE DISHWASHING

DIRECTIONS FOR USE

SUPRA RINSE is injected into the final rinse water on all machines by the use of highly specialised electronic dosing equipment that injects the correct amount of product each time the rinse cycle is activated. The results obtained with SUPRA RINSE are influenced by several factors, these being temperature of the final rinse water, efficiency of the dishwasher rinse, residual heat held by the article being washed and the quantity of SUPRA RINSE used.

SUITABILITY OF CHEMICALS FOR FOOD PREPARATION AREAS

SUPRA RINSE is suitable for use in kitchens and food preparation areas

HEALTH HAZARD INFORMATION:

See separate Health and Safety Data Sheet available on request.

PACKAGING:

- ◆ 5 Litre polyethylene drums
- ◆ 15 Litre polyethylene drums
